Darwin Auto Electrics is a family-owned business with over 37 years experience in the industry. Steve and Veronica's very busy workshop prides itself on quality customer service and dealing personally with each customer and their needs. Steve completed his automotive-electrical apprenticeship in Darwin just before Cyclone Tracy hit in 1974. Steve is involved in every facet of the industry and has a keen passion for his work.

Darwin Auto Electrics are proud to be associated with REDARC. We have found their products and service excellent and technical support second to none. REDARC has embraced the huge changes in technology in the automotive industry in particular with timers, voltage reducers and the ever-changing demands of dual battery systems. We are strong advocates of the robust and rugged design of the REDARC Smart Start SBI dual battery system. These units are required to survive in the harsh conditions we experience in the north of Australia. The product has the quality and features demanded by our customers and we proudly support Australian designed and manufactured innovative products like the REDARC Smart Start. As the main contractor for the NT Government's NT Fleet; Darwin Bus Service and the Darwin City Council, we have exclusively used the New Generation REDARC Smart Start Solenoid on with 100% success. At this point in time, we have never had a genuine warranty claim.

Steve Hodges
Director
