Lonsdale SA 5160

Re: New Manufacturing Facility

Dear Anthony,

Thank you for the opportunity to visit and inspect your new manufacturing facility on 28th February 2008. We were very impressed with the clean, flexible and environmentally friendly operation and believe that the Redarc team should be justifiably proud of the world class facility that has been established. The implementation of Lean manufacturing principles in the layout of the factory and the 'state of the art' SMT equipment provide a tremendous opportunity for REDARC to grow and enter export markets.

We are pleased that you are able to assist us with our SMT needs and look forward to working with your team to build on this initial project.

For your information, Fiberbyte Pty Ltd is an Australian company with research and manufacturing operations located in Adelaide, South Australia. Fiberbyte is a subsidiary of Silex Systems Ltd, a technology based public company located in Sydney.

Fiberbyte's activities include research, product development, systems integration, software development and production assembly.

Fiberbyte's patent pending USB in-Sync technology provides sub-nanosecond timing for data acquisition and control instrumentation on the Universal Serial Bus for the global test and measurement market.

We wish you every success and look forward to a bright and prosperous future together.

Yours sincerely,

Brian Noble
Technical Operations Manager
